

# Cats in the Classroom

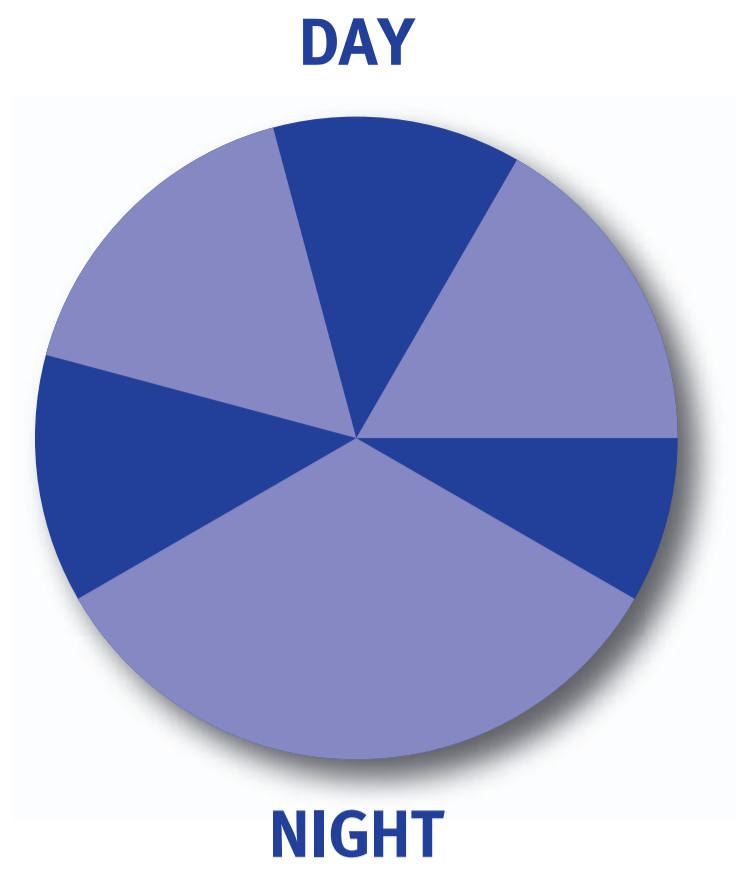

Healthy cats have a temperature between 38 and 39 degrees Celsius.

Cats can see six times better than humans in dim light.

A cat pregnancy lasts for approximately nine weeks.

ASLEEP AWAKE

Cats sleep for around 16 hours each day.

Cats live for around 14 – 15 years on average.

An adult cat has 30 teeth (16 at the top and 14 at the bottom).

Most cats have five toes on their front paws and four on the back ones.

One cat and her offspring can be responsible for 20,000 descendants unless they are neutered.
